

AFCONA - 3571

Chemical Composition

Modified anionic polydimethyl siloxane emulsion

Product general description

Additive to enhance surface properties in water-based coating

Product Properties

Advantages:

- Good compatibility to most water-based systems
- Improves surface slip
- Gives surface a soft feeling
- Anti-blocking effect
- Ready to use. Can be easily mixed with water for further dilution

Product specification

Active ingredients	: 58 - 62%
Solvent	: water
Specific gravity (25°C)	: 0.99 – 1.01 g/cm ³
pH value	: 6 - 8
Appearance	: milky white

Addition and dosage

0.1 - 1.0% added to the water-based systems

Incorporation

Can be incorporate in any stage of production

Storage

Should be stored in a cool dry place. When kept in an original unopened container, it will keep up to 3 years from the date of manufacture. The expiry date is indicated on the container. It contains water, therefor must be stored in plastic or coated containers

Packaging

25 kg and 190 kg non-returnable containers
