

AFCONA – PL124

Chemical Composition

Organo modified polysiloxane in aqueous emulsion.

Product general description

Slip and leveling agent for water based systems.

Product Properties

AFCONA-PL124 is an hydrophobic polymer emulsified in water. After the evaporation of the water it turns insoluble in water improving the slip and water resistance in the finished product. AFCONA-PL124 provides the following properties:

- Slip and leveling
- Improve substrate wetting
- No foam stabilization
- Improve Hydrophobic properties

AFCONA-PL124 is indicated for the use in all kind of water based systems.

Product specification

Active ingredients	35% +/- 1%
Solvents	Water
Density at 20 °C	0.98 g/cm ³ +/- 0,01
Flashpoint	> 100°C
Appearance	milk white liquid

Addition and dosage

0,1– 1.0% on total formulation.

Incorporation

AFCONA-PL124 should be added at the end of the batch preparation. For easier incorporation can be diluted with water.

Shake well before use!

Storage

AFCONA-PL124 should be stored in a cool dry place and protected against frost. When kept in an original unopened container, it will keep up to 2 years from the date of manufacture. The expiry date is indicated on the container.

Packaging

25 kg and 180 kg non-returnable containers
