

# EU-waX L 2630 W

Wax Dispersion 60% in Water

## Product Information

**L 2630 W** is **high solid** wax dispersion in water. This combination of Polyolefin-wax and PTFE is designed to improve mar and scratch resistance in **inks and industrial coatings**. In wood and furniture finishes it provides a smooth touch and reduced metal marking.

### Technical Data

Delivery Form	White liquid
Basis	Polyolefin-wax + PTFE
Solvent	Water
Solid content	60%
Melting point (wax)	130° C (wax)
Density (23 °C)	0.99 g / cm <sup>3</sup>

### Properties

Addition of 1% – 3% on total will provide the following effects

- In paints
  - **Excellent slip and mar – resistance**
  - **Reduction of metal marking**
  - **Block resistance**
- In inks
  - **Excellent abrasion resistance**

### Handling

**L 2630 W** is incorporated in the finished formulation by using normal stirring equipment.

Storage: 4°C – 30°C
