

EU-waX L 700 WI

Carnauba-Wax Dispersion 60% in Water

Product Information

L 700 WI is a **high solid** Carnauba-Wax Dispersion in Water designed for packaging coatings performing excellent mobility and scratch resistance.

Technical Data

Supply form	yellow thix. liquide
Solid/Wax	58% mod. Carnauba Wax
Solvent	water
Drop point (wax)°C	87
Penetration (mm x10 ⁻¹)	< 1
Density (23 °C)	~ 1 g / cm

Properties

Addition of 1% – 3% on total will provide the following effects:

- In paints
 - **slip and scratch resistance**
 - **excellent mobility**
 - **good abrasion resistance**

Handling

L 700 WI is incorporated in the finished formulation by using normal stirring equipment.

Storage: +4°C – +30°C; Shelf live 6 months

Packing: 950 kg net IBC; 200 kg net Steel Drum
